

Delta[®]

Commercial & Industrial Rotary Meter

Delta meters are volumetric meters. The flow of gas moves the pistons and each rotation traps and transfers a specific volume of gas. The movement is mechanically transmitted to the totaliser through the magnetic coupling.

APPLICATIONS

Delta meters are designed to measure natural gas and various filtered, and non-corrosive gases. They are used when very accurate measurement is required, when the gas flow can be low or irregular.

Due to the volumetric principle of the Delta meter, its metrology is not influenced by installation conditions. Consequently, it can be used to build very compact stations without installing a straight pipe inlet before the meter.

Delta meters are approved for fiscal use.

Technical Specifications

Flow rate	From 0.25 m ³ /h to 1000 m ³ /h, G10 to G650
Nominal Diameters	DN 25 to DN 150 (1" to 6")
Maximum Working Pressure	Up to 100 bar depending on the body material and flanging
Body Materials	Aluminium, ductile iron or steel. Compliant with the Pressure Equipment Directive 97/23/EC
Temperature Range	ATEX/PED: -30° C to +60° C MID: -25° C to +55° C Storage temperature: -40° C to +70° C
Metrology	In accordance with the EC and OIML, large rangeability up to 1:200, depending on the G-size Approvals EC (PTB): 1.33-3271.3-ROM-E11. Large rangeability (PTB): 1.33-3271.3-ROM-N05 Compliant with the Measuring Instrument Directive 04/22/EC
Intrinsic Safety Approval	L.C.I.E. 06 ATEX 6031 X - Compliant with the Directive 94/9/EC.

Typical calibration curve

KEY BENEFITS

- » Excellent metrological stability attested by customers over the years
- » No influence of installation conditions nor stop-and-go flow rate on the metrology
- » MID approved
- » Optimised pressure loss for low pressure network
- » Available in aluminium, ductile iron, or steel, for all applications
- » Equipped as standard with the Cyble target

DESCRIPTION

A Delta meter is made of 5 main parts:

- » A measuring chamber that is limited by the body and the 2 base plates (1)
- » 2 pistons, which are synchronised by 2 gears and which rotate in opposite directions (2)
- » 2 lubricant covers (3)
- » A magnetic coupling to transmit the movement of the pistons to the totaliser (4)
- » A totaliser to register the measured gas (5)

In accordance with the EC regulation, the maximum permissible error is +/-2% from Q_{min} to 0.2 Q_{max}, and +/-1% from 0.2 Q_{max} to Q_{max}. The WME (Weighted Measured Error) is less than 0.4%.

Typical Itron accuracy is +/-1% from Q_{min} to 0.2 Q_{max}, +/-0.5% from 0.2 Q_{max} to Q_{max}.

Delta DN80 G100 in aluminium equipped with the Cyble sensor

Gasket filters from DN25 to DN150

Delta DN80 G100 with Corus PTZ

Thermowell fitted with sealing holes

Mechanical drive according to EN 12480

Delta DN50 G65 S1-Flow equipped with extension for the totaliser and by-pass

Totaliser:

- » 9-digit index to register a larger volume
- » 45° orientation for an easy reading
- » Free-rotating totaliser
- » Equipped as standard with the cyble target: it allows the installation of the cyble sensor at any time.
- » Equipped with 1 built-in silicagel cartridge; as an option, equipped with an external cartridge to enable easy maintenance even in extreme conditions.
- » Fitted with a reflecting disc on the first drum.
- » Integrated optical disc to facilitate the periodic calibration of the meter.
- » Customised name plate (logo, bar-code, customer serial number...).
- » IP67 protection
- » UV resistant
- » Unit: m³

Universal totaliser fitted as standard with the Cyble target

Transmitters:

- » Double Low Frequency fitted as standard on the whole range.
- » Anti-tampering is supplied as standard.
- » Medium Frequency is supplied as an option on the DN50 to DN150.
- » High Frequency is supplied as an option on the whole range.
- » Mechanical drive according to EN 12480 is supplied as an option.

ACCESSORIES / OPTIONS

- » 100 µm flat **gasket-filter** to fit between flanges DN25 to DN150.

External silicagel cartridge:

- » Accessory for maintenance on the installed external silicagel cartridge for extreme conditions.

Pete's plug®:

- » Ideal device for filling lubricant in the cover of the meter while equipment is in service. It must be fitted instead of the tap plug of the cover. Plugged on the pressure tapping, it can be used to measure the pressure and the temperature of the measured gas. Connection size: ¼" NPT or ¼" BSP. Maximum pressure of gas: 20 bar.

Bracket for mounting a volume converter:

- » This device permits the Itron Corus PTZ volume converter to be adapted directly onto the meter, or at the most convenient place to the meter to enable the converter index to be easily read.

Thermowells:

- » These threaded ¼" NPT thermowells, can be plugged onto the meter. They can be retrofitted on to the standard version (plugged onto the existing pressure tapping), or they can be installed on the versions equipped with extra-tapping. The internal diameter of the thermowell is 7 mm; it enables mounting of most standard temperature probes.

Extension for the totaliser:

- » This option allows the possibility to increase the distance between the body of the meter and the index, to facilitate the reading when the meter is covered with ice due to measurement at low temperatures.

By-pass:

- » It can be installed as an option on the steel version DN50. It enables the gas to flow even if the meter is blocked for any reason.

Cyble sensor:

- » It can be delivered mounted onto the meter or installed afterwards at any time. The Cyble sensor is a bounce-free transmitter. It allows also the counting of eventual back flows.

DELTA COMPACT - ALUMINIUM

Main Characteristics

- » The Itron Compact DELTA meter is ideal for installation in extremely small cabinets.
- » Available in thread version (L=121mm) or flanged version (L=171mm).
- » Index can be oriented as required, magnetic coupling.
- » Multi-position meter, the flow orientation does not need to be specified when ordering the meter.
- » Only the front cover has to be filled with lubricant.
- » Thermowell: supplied as an option, 1 tapping 1/4" NPT allows an easy installation of a thermowell.
- » Double Low Frequency transmitter connected on a Binder 6 pins plug. Anti-tampering is supplied as a standard.
- » HF is supplied as an option, connected on a Binder 6 pins plug.
- » Equipped as standard with the Cyble target.

Technical Features

Flow rate	0.25 m³/h to 65 m³/h
G size	G10, G16, G25 and G40
Rangeability	1:20 to 1:200
Threaded version	DN40 1½" BSP or NPT
Flanged version	DN25, DN40 and DN50 (1", 1½", 2") ISO PN10/16, PN20 and ANSI125-ANSI150
Pressure range	Up to 19.3 bar

Delta DN50 G40

Delta DN50 G40 fitted with Cyble sensor

DELTA 2050/2080/2100 - ALUMINIUM

Main Characteristics

- » Index can be oriented as required, magnetic coupling.
- » Both front and rear covers must be filled with a lubricant.
- » Multi-position meters, the flow orientation does not need to be specified when ordering the meter.
- » Thermowells: supplied as an option, 2 tapings 1/4" NPT allow an easy installation of thermowells.
- » Double Low Frequency transmitter connected on a Binder 6 pins plug. Anti-tampering is supplied as a standard.
- » MF is supplied as an option.
- » HF is supplied as an option, connected on a 3 pin binder.
- » A G100 DN50 is available to allow the possibility of increasing the station capacity; the use of the same flanging as the G65 DN50 does not require modification of the existing installation.
- » Equipped as standard with the Cyble target.

Technical Features

DELTA 2050/2080/2100 & S3-FLOW - DUCTILE IRON - EN-GJS-400-18LT

Main Characteristics

- » Index can be oriented as required, magnetic coupling.
- » Both front and rear covers must be filled with a lubricant.
- » Multi-position meters, the flow orientation does not need to be specified when ordering the meter.
- » Thermowells: supplied as an option, 2 tapings 1/4" NPT allow an easy installation of thermowells.
- » Double Low Frequency transmitter connected on a Binder 6 pins plug. Anti-tampering is supplied as a standard.
- » MF is supplied as an option.
- » HF is supplied as an option (up to 3 HF possible for the S3-Flow!).
- » High Temperature Loading: fire resistant PN5 is supplied as an option.
- » Equipped as standard with the Cyble target.

Delta DN80 G100 3xDN in Ductile iron equipped with Cyble sensor

DELTA S1-FLOW - STEEL

Main Characteristics

- » Index can be oriented as required, magnetic coupling.
- » Double Low Frequency transmitter connected on a 6 pin Binder plug. Anti-tampering is supplied as a standard.

DN50

- » G16 to G100
- » S-Flow technology
- » Only the front cover must be filled with a lubricant.
- » Multi-position meter
- » MF is supplied as an option.
- » 2 thermowells are supplied as option.
- » A by-pass can be installed as an option.
It enables the gas to flow even if the meter is blocked for any reason.
- » An alarm can be remotely sent requesting for maintenance.
- » Up to 2 HF are supplied as option.

Technical Features

Flow rate	0.4 m³/h to 160 m³/h
G size	G16, G25, G40, G65 and G100
Rangeability	1:20 to 1:200
Nominal diameter	50 (2")
Flanging	PN 10/16 to PN110, ANSI 150 to ANSI600
Pressure range	101.2 bar

Steel Range DN50:

⁽¹⁾Δpr: Pressure loss (mbar) with ρ = 0.83Kg/m³ and at Qmax

Delta DN50 G65 S1 Flow in steel and equipped with by-pass

A) TRANSMITTER CHARACTERISTICS

Intrinsic safety approval: L.C.I.E. 06 ATEX 6031 X
Intrinsic safety level: Ex II 1/2 G Ex ia IIC T5 c T6

Low Frequency pulse transmitters (LF):

The LF transmitter consists of 2 dry Reed switches, normally open, and controlled by a magnet situated in the first drum of the totaliser. The LF connections are without polarity.

1) Internal Reed contacts

- » Hermetically sealed contacts
 - Maximum terminal voltage: 30 Volt and maximum current according to EN 60079-11.
- » Ambient temperature
Ta = -30°C to +60°C
- » Minimum pulse time: 0.4 s

2) Cyble sensor

- » It conforms to CENELEC standard EN 60079-11 with:
 - Ui ≤ 14.3 Volt
 - li ≤ 50 mA

Inductive transmitters (HF and MF):

They are inductive sensors actuated by a toothed disc. The frequency is proportional to the instantaneous flow. The polarity of the connections is indicated on the name plate of the meter.

1) High Frequency transmitters

- » Proximity detectors conform to EN 60947-5-6 (NAMUR) standards.
- » They conform to CENELEC standards (EN 60079-0 and EN 60079-11) with:
 - Ui ≤ 15 Volt
 - li ≤ 50 mA
 - Ci ≤ 90 nF
 - Li ≤ 100 µH
 - Pi ≤ 120 mW
- » Ambient temperature
Ta = -30°C to +60°C

2) Medium Frequency transmitter

- » It conforms to CENELEC standards (EN 60079-0 and EN 60079-11) with:
 - Ui ≤ 16 Volt
 - li ≤ 52 mA
 - Ci ≤ 50 nF
 - Li ≤ 250 µH
 - Pi ≤ 64 mW

Anti-tampering transmitter (AT):

This consists of one dry Reed switch, normally closed. Attempts at magnetic tampering will open the contact. The electrical characteristics are the same as those for the LF transmitter.

B) PRESSURE LOSS OF THE DELTA METERS

Calculation of pressure loss: $\Delta p = \Delta p_r \times \frac{\rho n}{0.83} \times (P_b + 1) \times \left[\frac{q}{Q_{max}} \right]^2 \times \left[\frac{273}{(273 + T_b)} \right]$

C) INSTALLATION

Each meter is delivered with binder plugs for the installed transmitters and oil for the lubrication. Please refer to the instruction manual supplied with the meter.

The advice given therein will ensure optimal use of the Delta meter over the years.

Delta DN150 G650 S3-Flow in Ductile iron

where:

- Δp: Pressure loss in the calculated conditions
- Δpr: Pressure loss in the reference conditions
- ρn: Gas density (kg/m³) at 0° C and 1013 mbar
- Pb: Operating pressure (Bar gauge)
- q: Flow rate (m³/h)
- Qmax: Maximum flow rate (m³/h)
- Tb: Gas temperature (°C).
